

iGuardStove®

The Automatic Stove Shut Off Device

Did I Leave The Stove On?

Safety and Protection from Cooking Fires
Home Care Solution Promoting Independence
A Smart Home Device Connecting Families

The iGuardStove will automatically shut off the stovetop if you leave your cooking unattended for a pre-set period of time

iGuardStove® *Intelligent* Features

- ✓ Advanced Motion Sensing and Timer Technology
- ✓ Automatic Stove Shut Off Timer – Pre-set at 5 minutes, adjustable between 1 and 15 minutes
- ✓ Manual Override Timer – Allows user to override the Auto Shut Off Timer when longer uninterrupted cooking times are required
- ✓ Emergency Button – Quick shut off and sends a text/email alert to people you have on your Contacts List
- ✓ Late Night Lock – Time based lock that prevents use of the stove during late night hours
- ✓ Caregiver Lock – Fully disables the stove right at the device
- ✓ Child Lock – Prevents stove from turning on due to turning of knobs by children, pets or accidental contact
- ✓ Collects data – Shows if and when cooking is happening and how many times the stove is being forgotten. Aids in memory evaluation
- ✓ Activity Monitor – Alerts you if no motion is seen during certain times and records any motion in the kitchen during late night hours
- ✓ Remote Access – Allows receipt of alerts and access to settings using your smart devices.
