

iGuardStove®

The Automatic Stove Shut Off Device

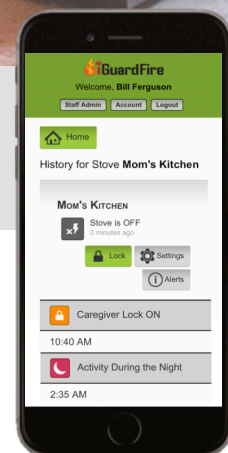

Did I Leave The Stove On?

New York Times – “... in our research the iGuardStove is the BEST Smart Stove Shutoff system we could find.”

An Incredible Smart Home Device
That Includes Many Unique Home
Care Features for Peace of Mind

The iGuardStove Automatically Shuts Off The Stove
When It Senses The Cooking Has Been Forgotten!

iGuardStove®

Plus Many Online Home Care Features

- ✓ Patented Advanced Motion Sensing and Timer Technology
- ✓ Automatic Shut Off Timer - Motion sensor & countdown timer automatically shuts off the stove after 5 minutes of no motion in the kitchen.
- ✓ Normal Stove Mode – Allows for longer periods of uninterrupted and unattended cooking times for foods like a roast or to simmer a soup
- ✓ Emergency Button – Instant Stove Shut Off and can send a text/email alert that its off to people you have on your Contacts List
- ✓ Late Night Lock – This time based lock prevents use of the stove during late night hours or other unwanted times
- ✓ Caregiver Lock – Fully disables the stove right at the device giving secure control to care workers and family members
- ✓ Child Lock – Prevents the stove from energizing due to the knobs being turned by children, pets or accidental contact
- ✓ Insights – Can expose changes in memory, potential sleep disorders, onset of Dementia, disrupted eating patterns and more
- ✓ Activity Monitor – Alerts you if there is no motion during certain times and records any motion in the kitchen during late night hours
- ✓ Ambient Room Temperature Monitor – Be alerted when either hot or cold temperature limits are exceeded. ie: can prevent frozen pipes
- ✓ Gas Sensor – Detects and warns of unburned gas (gas model only)
- ✓ Remote Access – Allows receipt of alerts and access to settings using your Smart devices. It also has Remote Shut Off/Lock Out capabilities

**TRACK STOVE ACTIVITY &
REMOTELY ACCESS CONTROLS VIA THE INTERNET**

The iGuard solution called **Insights** can provide you with a valuable collection of information from the kitchen that can identify both immediate issues as well as situations that are developing over time.

Insights provides you the information in the form of:

- ✓ Easy to read graphs and reports
- ✓ Texts & Email to family, caregivers and others to keep them informed of important issues that are developing
- ✓ Calendars showing events history and stove use

How Insights can help:

- ✓ It can let you know on a daily basis that the residents are up and active
- ✓ Reveal memory deterioration and the possible onset of Dementia
- ✓ Expose possible sleeping disorders
- ✓ Uncover changes in eating habits
- ✓ Plus, much more while respecting their privacy and dignity

Here is a list of the **Insights** Alert Messages:

[Turn On](#) - Lets you know the moment someone has turned the stove on

[Auto Shut Off](#) - Alerts you to the fact that the stove has been forgotten and had to be shut off automatically by the iGuardStove

[Good Morning Message](#) - Lets you know when someone is mobile and has arrived into the kitchen to start their day. This message only comes to you once a day.

[No Motion Detected](#) - Lets you know that no one has shown up in the kitchen to start their day and/or may be immobile.

[Unburned Gas Alert](#) - Alerts you to a dangerous build-up of unburned gas.

[Emergency Button Pressed](#) - Someone may be in distress and has pressed the Emergency button to shut off the stove.

[Room Temperature Alerts](#) - Either of the high/low temperature extremes has been reached.

[Loss of Communication](#) - The server can no longer see the device to send out Alerts. Attention is required.

DAILY EVENTS:

The Daily Events display can show you how and when the stove is being used as well as showing you movement in the kitchen.

The bottom event on this report named “First Activity Seen During the Day” also arrives on your smart device letting you know that someone is up and mobile and has entered the kitchen.

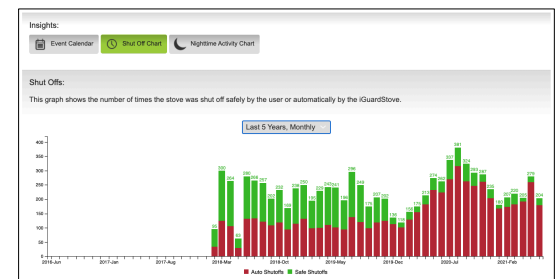

Events for Saturday Jun 19, 2021:

Event	Time
Activity Seen	10:01 PM
Activity Seen	8:43 PM
Stove Turned Off	4:44 PM
Stove Turned On	4:28 PM
Stove Turned Off	10:28 AM
Stove Turned On	10:17 AM
Stove Turned Off	8:23 AM
Stove Turned On	8:16 AM
First Activity Seen During the Day	6:14 AM

MEMORY:

In this example, the Memory report highlights that over the last 12 months there has been an increase in the number of times the iGuard has had to step in and automatically shut off the stove.

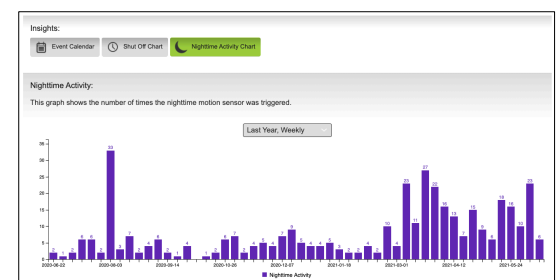

This could be an indication that your loved one’s memory is deteriorating.

SLEEP:

This example of a Sleep report shows that over the last 3 months there has been an increase in the number of times the iGuard’s motion sensor has seen someone walk through the kitchen late at night.

This could be an indication that your loved one’s sleeping habits have changed and it could be an indication of a possible sleep disorder.

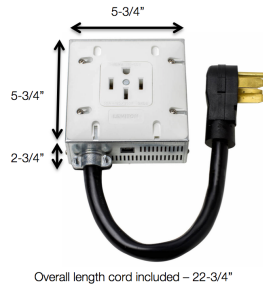

CONVERT ANY ELECTRIC OR GAS STOVE INTO A SMART & SAFE STOVE

iGuardStove

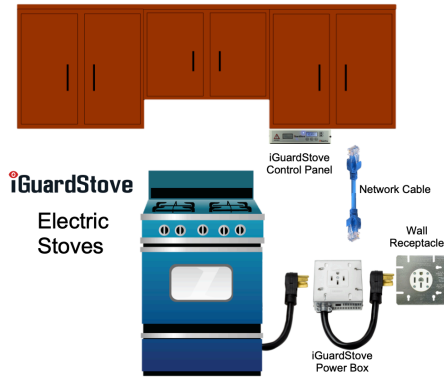

Providing a Blanket of Protection

iGuardStove Electric – Plug-in	
IGSE-4-Black	
IGSE-4-White	
SPECIFICATIONS	
Wattage Draw	5 Watts
Wi-Fi	2.4 GHZ ~ 2.5 GHZ
Cable Supplied	10' Cat5e Cable with RJ45 ends.
Supply Voltages	Input: 125/250 VAC 50 Amp Output: 125/250 VAC 50 Amp
Plugs and Receptacles	NEMA 14-50 Standard – 4 prong Power Box has 17" cord
Operating Temps	Approx. -40F - 140F (-40C - 60C)
